Independent Verification & Validation Program	Project Management	IVV 09-4 Version: AG Effective Date: June 24, 2014
--	---------------------------	---

1.0 Purpose

The purpose of this system level procedure (SLP) is to establish a consistent and documented method of performing project management for the IV&V Office.

2.0 Scope

This SLP applies to all IV&V Office personnel who perform project management for IV&V or system/software engineering tasks for the NASA IV&V Program.

<p style="text-align: center;">Independent Verification & Validation Program</p>	<p style="text-align: center;">Project Management</p>	<p>IVV 09-4 Version: AG Effective Date: June 24, 2014</p>
---	--	---

3.0 Definitions and Acronyms

Official NASA IV&V roles and terms are defined in the Quality Manual. Specialized definitions identified in this SLP are defined below.

3.1 Business Manager (BM)

Within the scope of this SLP, the BM monitors the financial resources for the IV&V Office and coordinates with contracting and program financial management personnel to enable the planning, mechanization, and execution of IVVO work. The BM coordinates with Project Managers (PMs) to establish financial resource requirements for IV&V activities, monitors IVVO financial performance, reviews contractor financial deliverables on behalf of IVVO, and provides analysis to PMs or Group Leads with respect to planning and performance as appropriate or requested.

3.2 Deliverable

A deliverable is a product identified as a deliverable within task orders, contracts, or IV&V Project Execution Plans (IPEPs). Products required by a task order or contract may be known as formal deliverables; other products may be known as informal deliverables.

3.3 IV&V Office Management

IV&V Office Management is the managing body of NASA IV&V civil service employees that includes the IV&V Office Lead, the IV&V Office Business Manager, and the IV&V Office Group Leads, (IV&V, CD, TQ&E, JSTAR, and SWAT), and other leads as assigned by the IVVO Lead.

3.4 Milestone

A milestone is an event in the lifecycle of a project that is generally

<p align="center">Independent Verification & Validation Program</p>	<p align="center">Project Management</p>	<p>IVV 09-4 Version: AG Effective Date: June 24, 2014</p>
--	---	---

3.5 Project Artifacts

Project Artifacts are the products, documents, and information delivered to the NASA IV&V Program for use in performing IV&V activities on a project.

3.6 Acronyms

	BM	Business Manager
CAR		Corrective Action Request
CD		Capability Development
COR		Contracting Officer Representative
ECM		Enterprise Content Management
FA		Formal Agreement
FRR		Flight Readiness Review
IBA		IV&V Board of Advisors
IPEP		IV&V Project Execution Plan
IVVO		IV&V Office
JSTAR		Jon McBride Software Testing and Research
NODIS		NASA Online Directives Information System
NPR		NASA Procedural Requirements
ORBIT		Observation, Requirements (or Risks), Backlog and Issue Tracking
PAR		Preventative Action Request
PBRA		Portfolio Based Risk Assessment
PFM		Program Financial Management
PM		Project Manager
PMER		Performance Monitor Evaluation Report
POC		Point of Contact
QM		Quality Manual
RBA		Risk Based Assessment
RRB		Risk Review Board
SBU		Sensitive But Unclassified
SLP		System Level Procedure
SMSR		Safety and Mission Success Review

Independent Verification & Validation Program	Project Management	IVV 09-4 Version: AG Effective Date: June 24, 2014
--	---------------------------	---

4.0 Process Flow Diagram

The following diagram depicts processes described in this document, and the responsibilities and actions that shall be performed by process participants or their designees. Any information supplemental to the depicted process will appear after the diagram.

4.1 Project Lifecycle

<p style="text-align: center;">Independent Verification & Validation Program</p>	<p style="text-align: center;">Project Management</p>	<p>IVV 09-4 Version: AG Effective Date: June 24, 2014</p>
---	--	---

Based Risk Assessment (PBRA) process conducted prior to the Initialization state. (Information regarding the PBRA process can be found in S3106, *PBRA and RBA Process*.) Through all phases of the lifecycle the PM will follow IVV 16, *Control of Records*.

During the lifecycle of the project, any risks, Lessons Learned, and Success Stories should be compiled. The IV&V Office will provide a status of project risks to the Risk Review Board (RRB) on a monthly basis.

4.2 Project Initiation

For IV&V Project Initiation, the IV&V Office shall assign a Project Manager (PM) and a core set of IV&V Analysts to a new project. The PM shall initiate communications with the Project to provide an overview of IV&V, acquire a project schedule, and establish objectives. The PM will then conduct a heritage review to identify relevant products and artifacts from heritage projects that may be applicable to the current project.

4.3 Project Planning

During the planning state, the PM shall work with the Technical Quality and Excellence (TQ&E) Group to establish the scope and technical rigor of the IV&V effort to be applied. During the Project Planning state, the IV&V PM establishes the Assurance Strategy for the IV&V Project which encapsulates the goals, objectives, and Assurance Statements that the IV&V project plans to accomplish throughout its lifecycle.

The PM shall develop a Formal Agreement (FA) that will document and communicate to the customer the planned technical and management approaches that will be used in the execution of the IV&V Project. The IV&V Project Execution Plan (IPEP) will serve as that formal agreement

<p style="text-align: center;">Independent Verification & Validation Program</p>	<p style="text-align: center;">Project Management</p>	<p>IVV 09-4 Version: AG Effective Date: June 24, 2014</p>
---	--	---

(Information regarding IPEP preparation can be found in T2103, *IPEP Template*; and additional information can be found in IVV 09-1, *Independent Verification and Validation Technical Framework*.)

The FA shall include, but is not limited to, the following information:

- Purpose
 - Customer contact information
 - IV&V Team and customer communication approach
 - Roles and responsibilities
 - IV&V goals and objectives
 - Technical approach
 - Project schedule reference
 - Issue resolution protocol
 - Resource requirements

When an IPEP is developed, the PM shall provide a draft to the IV&V Office Lead and the TQ&E Group for collaboration toward a shared agreement. The IPEP shall be approved by IV&V Office Lead. The PM shall provide the IPEP to the customer for concurrence. Where there is a lack of agreement between parties, the IV&V Office Lead will have authority for resolution. The PM shall review the FA every 6 months and update the FA as necessary. The PM will work with the IV&V Office BM to refine resource requirements for the project.

4.4 Project Execution

During the Execution state, the PM shall monitor and manage the IV&V schedule, budget, risks, issues, and communications, of the IV&V Project, to include all product deliveries specific to the project. The PM shall support the BM's evaluation of IV&V Project resource allocations, utilization and out-month staffing plans. The BM will also make the

Independent Verification & Validation Program	Project Management	IVV 09-4 Version: AG Effective Date: June 24, 2014
--	---------------------------	---

servant representative who will be responsible for the above tasks.

Independent Verification & Validation Program	Project Management	IVV 09-4 Version: AG Effective Date: June 24, 2014
--	---------------------------	---

4.4.1 Deliverable Processing

4.4.1.1 Control of Customer-Supplied Products, Product Identification, and Traceability

The PM shall ensure that appropriate Project Artifacts (e.g., documents, code, databases) are used when performing tasks and that they are identified in any resulting report/output (e.g., version, date). In addition, the PM shall identify and ensure adherence to any privacy- and/or security-related requirements associated with customer-supplied products, which includes NASA Export Control Regulations and Sensitive But Unclassified (SBU).

4.4.1.2 Inspection of Product

The BM/PM shall objectively evaluate all IV&V Products before submission to the customer (e.g. Development Project). If the product is required by a contract or task order (i.e., if it is a formal deliverable) then acceptance or rejection notification will be provided to the COR within 10 working days. If rejected, the BM/PM will also provide issues of discrepancy to the COR. The BM/PM shall objectively evaluate such products for quality using applicable criteria including, but not limited to, those identified in the contract and/or task order requirements.

For any IV&V Project for which there is a contractor PM, the IV&V Office designated civil servant representative will be designated as the person responsible for evaluating products required by a contract or task order (i.e., formal deliverables). The designated civil servant shall evaluate the product and provide acceptance or rejection notification to the COR within

Independent Verification & Validation Program	Project Management	IVV 09-4 Version: AG Effective Date: June 24, 2014
--	---------------------------	---

working collaboratively with the PM to ensure accuracy of data reported specific to their respective project.

4.4.2 Deliverable Distribution

4.4.2.1 Control of Nonconforming Product

If the NASA IV&V Program identifies a problem with an IV&V Product that has already been delivered to the customer, the PM shall immediately inform the Point of Contact (POC) of the problem. If the customer identifies a product produced by the NASA IV&V Program as nonconforming (e.g., in an inappropriate format or performed on the wrong project artifact), the PM shall resolve the issue with the customer.

Regardless of how the problem has been identified, the PM shall:

- Complete a Corrective Action Request (CAR) per IVV 14, *Corrective and Preventive Action*
- Ensure that the problem is resolved and that the customer is provided a full explanation of events
- Request closure of the CAR once the nonconforming product has been approved and sent to the customer

The nonconforming product shall be subjected to its established verification process once the nonconforming product has been corrected.

4.4.2.2 Product Review and Approval Process

The PM shall submit IV&V Products that are delivered to the customer for review and approval to ensure quality of the

<p align="center">Independent Verification & Validation Program</p>	<p align="center">Project Management</p>	<p>IVV 09-4 Version: AG Effective Date: June 24, 2014</p>
--	---	---

of the review and approval process. The PM shall place the original *Concurrence Sheet* with signatures in one of the designated filing boxes for storage in the physical records filing system. Refer to IVV 16, *Control of Records*, for further

guidance.

Customer Deliverable Products Requiring Form 1007, Concurrence Sheet			
Product	Originator	Reviewers	Approver
Safety and Mission Success Review (SMSR)	PM	IV&V Office Management	NASA IV&V Director
Flight Readiness Review (FRR)	PM	IV&V Office Management	NASA IV&V Director
IBA-funded Formal Agreements (IPEP)	PM	TQ&E Group, IV&V Office Management	IV&V Office Lead
Non-IBA-funded Formal Agreements (IPEP, other agreements)	PM	TQ&E Group, IV&V Office Management, PFM Group, COR	NASA IV&V Director

Table 4.4.2.2-1

The following products do not utilize Form 1007, but still require review and approval prior to delivery to the customer. The review and approval authority for these products are outlined in the below table.

Independent Verification & Validation Program	Project Management	IVV 09-4 Version: AG Effective Date: June 24, 2014
--	---------------------------	---

in the specific project deliverable folder.

- IV&V presentations for customer project milestone reviews - the review and approval process by the IV&V Office

Lead will be captured by utilizing ECM capabilities (e.g., Make Generation or Work Flow capabilities).

Independent Verification & Validation Program	Project Management	IVV 09-4 Version: AG Effective Date: June 24, 2014
--	---------------------------	---

Customer Deliverable Products Not Requiring Form 1007, Concurrence Sheet			
Product	Originator	Reviewers	Approver
Severity 1 and 2 TIMs	IV&V Project Team	PM	TQ&E Group
IV&V Technical Reports	IV&V Project Team	None	PM
IV&V Presentations for Customer Project Milestone Reviews	PM	None	IV&V Office Lead

Table 4.4.2.2-2

4.4.3 Contractor Performance Evaluation

The BM/PM, as Task Monitors for the IV&V Project he/she is assigned to, is required to prepare and submit a Performance Monitor Evaluation Report (PMER) to the COR as outlined in the contract Performance Evaluation Plan.

For any IV&V Project for which there is a contractor PM, a civil servant representative will be designated as the performance monitor for that IV&V Project. The designated civil servant shall prepare and submit the PMER to the COR semi-annually as outlined in the contract Performance Evaluation Plan.

4.5 Project Review

Independent Verification & Validation Program	Project Management	IVV 09-4 Version: AG Effective Date: June 24, 2014
--	---------------------------	---

recommendations that the TQ&E Group provides as a result of these Project Reviews.

Independent Verification & Validation Program	Project Management	IVV 09-4 Version: AG Effective Date: June 24, 2014
--	---------------------------	---

4.6 Project Close

The IV&V Project will enter the Project Close state when planned analysis is complete or the IV&V Project is cancelled. Once an IV&V Project enters the Close state, the PM shall ensure that the following closeout activities are completed:

- Customer and project artifacts and IV&V products are cataloged and archived. Physical records (including binders, DVDs, etc.) should be submitted to the Records Team for safe filing. If physical records are already on ECM, then the physical records will be considered to be copies and destroyed. For artifacts stored electronically, the NASA IV&V Records Team should be notified of the location of the artifacts to be archived. The Records team shall move the artifacts to the appropriate write-protected location or change permissions of the artifacts to match the write protected location. For additional details see S3016, *Reference Guide for Controlling Records at Project Closeout*.
- All Lessons Learned and Success Stories are documented per IVV 23, *Lessons Learned*, and IVV 24, *Success Stories*

5.0 Metrics

Any metrics associated with this SLP are established and tracked within the NASA IV&V Metrics Program.

Independent Verification & Validation Program	Project Management	IVV 09-4 Version: AG Effective Date: June 24, 2014
--	---------------------------	---

6.0 Records

The following records will be generated or updated and filed in accordance with this SLP and IVV 16, *Control of Records*, and in reference to NASA Procedural Requirements (NPR) 1441.1, *NASA Records Retention Schedules*.

Record Name	Original	Vital	Responsible Person	Retention Requirement	Location
FA signed by customer	Y	Y	PM	Retire at close of program/project (8/101)	Filing System and ECM System
Concurrence Sheet for associated FA submitted to customer	Y	N	PM	Retire at close of program/project (8/101)	Filing System
Concurrence Sheet for FA annual review	Y	N	PM	Retire at close of program/project (8/101)	Filing System
Customer Products (e.g., Technical Reports, Severity 1 and 2 TIMs, Milestone Reviews)	Y	Y	PM	Retire at close of program/project (8/101)	ECM System or ORBIT (for TIMs)
Concurrence Sheet for review of IV&V presentations at a SMSR or FRR	Y	N	PM	Retire at close of program/project (8/101)	Filing System

Independent Verification & Validation Program	Project Management	IVV 09-4 Version: AG Effective Date: June 24, 2014
--	---------------------------	---

VERSION HISTORY				
Version	Description of Change	Rationale for Change	Author	Effective Date
Basic	Initial Release		Greg Blaney IT/387	01/30/1998
A – U	Revision information older than 7-year retention period relocated to Version History Overflow Document		Various	04/07/1998 – 07/26/2006
V	Update process flow diagrams to align with Facility Management paradigm		Stephanie Ferguson	09/21/2007
W	Update Quarterly/Annual Responsibilities flow to reflect correct PMER input intervals		Raju Raymond	12/05/2007
X	Update IPEP process description; also included reference to PEP		Deborah Stiltner	02/19/2009
Y	Update for organizational changes, shift from product line to projectized structure.		Natalie Alvaro	07/16/2010
